

Transform your med-pass process with our medication packaging program. Your patients' meds are ready for administration in easy-to-use strip packaging. Your nurses will spend less time sorting and punching medication cards and more time providing patient care.

### Safer, more efficient med-pass:

- ✓ No more punching cards at a patient's bedside; simply check the MAR and tear open the package.
- ✓ Interruptions during med-pass are less likely to create a medication-related error

### Managing medications has never been easier:

- ✓ Organized by date and time in clearly labeled pouches
- ✓ Packages include details such as patient name and location, hour of administration, medication name, strength and description
- ✓ OTCs packaged alongside your patient's prescriptions
- ✓ Easy medication changes – new meds sent directly from the pharmacy in another strip until the next fill

Improved state survey results, patient outcomes, and nurse satisfaction rates.

### How does the program work?

- 1) Schedule an appointment to discuss your facility's needs in detail.
- 2) An O'Reilly Family Pharmacy staff member will be your personal contact during the transition. We will ensure all patient's medications are packaged according to your specifications.
- 3) Start receiving continuous, high quality service from O'Reilly Family Pharmacy.
